

AERIAL

DESCRIPTION

Machine designed for **the transport of boxes or containers with fruit and vegetables**, taking advantage of the vertical space of the post-harvest line. It allows boxes to be moved continuously between different machines or storage areas, facilitating organization and optimizing workflow.

Its modular and adaptable design allows it to be adjusted to different heights and lengths, easily integrating into any packaging or packaging line. The robust structure and durable components ensure safe transport of the fruit, reducing manual handling and increasing production efficiency.

FEATURES

Voltage:	380/220V III [220V Single Phase on Demand]
Main Function:	Transport of boxes or containers with fruit and vegetables
Application:	Post-harvest lines for citrus fruits and other fruit and vegetable products
Configuration:	Adjustable height and length depending on installation
Construction:	Sturdy metal frame, easy cleaning
Online Integration:	Compatible with treatment, packaging and storage machines
Main Advantage:	Utilization of vertical space and continuous flow
