

BASKET MAKING MACHINE

DESCRIPTION

The **basket making table** is designed to **facilitate the filling of baskets of different sizes** in a uniform and controlled manner. Its system has **distribution belts with belts of different direction of advance**, which allow the fruit to be distributed homogeneously in each basket, guaranteeing a constant flow and avoiding accumulations.

Its robust and functional construction ensures efficient handling of citrus fruits and other fruits, optimizing the pre-filming process and reducing possible damage to the product during handling. This solution is ideal for packaging lines that require speed, order and precision in packaging.

FEATURES

Installed Power:	Variable
Voltage:	380/220V III [220V Single Phase on Demand]
Other features:	Assembled with a ready-made box output conveyor
Main Function:	Facilitate the homogeneous filling of baskets of different sizes
Distribution System:	Cast films with different direction of travel
Application:	Citrus fruits and other fruits of similar size
Construction:	Robust metal structure, easy cleaning and maintenance
Online Integration:	Compatible with conveying and filming systems
Main Advantage:	Optimizes workflow and reduces damage to fruit
