

BIN FILLER WEIGHER

DESCRIPTION

The **Bins filler and weigher** is a machine designed for the **automatic filling and weighing of large capacity containers (Bins)**, guaranteeing a fast, efficient process with the utmost care for the product.

Its system incorporates a **mobile unloading conveyor**, which distributes the fruit evenly inside the container, avoiding blows and ensuring delicate treatment throughout the process. The integrated weight control allows the amount of fruit in each Bin to be precisely adjusted, optimising product management in fruit and vegetable centres.

This equipment is characterized by its **robustness, reliability and ease of integration** into post-harvest lines, offering a practical solution for the storage and logistics of citrus fruits and other fruits.

FEATURES

Installed power:	1.6 kW
Voltage:	380/220V III [220V Single Phase on Demand]
Production:	3600/4300 kg/h
Main Function:	Automatic Filling and Weighing of Bins
Discharge system:	Mobile conveyor for better fruit distribution
Weight management:	Precision adjustable as required
Application:	Citrus and other post-harvest fruits
Construction:	Robust and easy-to-clean metal structure
Online Integration:	Supports picking, calibration, and storage processes
Main Advantage:	Maximum fruit care and filling optimization
