

CAMEL

DESCRIPTION

The Camel is an essential machine in fruit and vegetable packaging lines, specially designed to speed up the filling of boxes with fruit in mesh. Its double conveyor system on two levels allows you to work in a comfortable and orderly way: the upper belt circulates the fruit nets, while the empty boxes ready to be filled are located on the lower part.

The operators take the meshes from the upper belt and deposit them inside the box. Once filled, the box is moved along the rollers by the operator's own push, until it is incorporated into the lower conveyor, where it continues its journey to the next stages of preparation.

This system stands out for its **simplicity, robustness and ease of integration** into any line, offering a practical solution for packaging citrus and other fruit in mesh boxes.

FEATURES

Installed Power:	1.6 Kw
Voltage:	380/220V III (220 V Single Phase Low Drive)
Transport system:	Double conveyor: upper for meshes, lower for boxes
Loading area:	Side entry with free rollers
Working method:	Manual transfer of meshes to boxes by operators
Moving boxes:	Manual by push on rollers
Compatible fruit:	Citrus netting (orange, tangerine, lemon, grapefruit)
Packaging Type:	Standard boxes or baskets
Capacity:	Variable according to caliber, mesh size and number of operators
Construction:	Robust metal frame, easy cleaning and low maintenance
Online Integration:	Compatible with closure, weighing, labeling and palletizing processes
