

COLLECTOR

DESCRIPTION

Machine designed for the **transport of boxes or containers with finished fruit and vegetables**, collected directly from the packing machines. Its main function is **to lead the product to the end of the line**, where palletizing or other storage and dispatch stages are located.

The Collector allows for a continuous and orderly flow of product, reducing manual handling and ensuring that boxes arrive safely and efficiently at their final destination. Its modular design makes it easy to integrate into any post-harvest line, adapting to different box sizes and transport lengths.

FEATURES

Voltage:	380/220V III [220V Single Phase on Demand]
Main Function:	Transport of boxes and containers with finished fruit and vegetables
Application:	Picking up product from packing machines and sending it to palletizing or storage
Configuration:	Adjustable length and direction depending on installation
Construction:	Sturdy metal frame, easy cleaning
Online Integration:	Compatible with packaging tables, fillers and palletizing areas
Main Advantage:	Optimizes final product flow and reduces manual handling
Flexibility:	Modular system adaptable to different sizes of boxes and containers
