

FRUIT COUNTER

DESCRIPTION

The fruit counter is a machine designed to perform an accurate and constant count of citrus fruits. Its two-lane feeding system together with the motorized circular brushes ensures that each fruit advances individually, guaranteeing an even and blockage-free count.

Thanks to this system, the machine allows a record of the total amount of fruit treated and a labelling machine can be integrated to mark each fruit individually, facilitating control in packaging, packaging and order preparation processes.

It is a robust and reliable equipment, adaptable to different sizes of fruit (orange, mandarin, lemon, grapefruit, etc.). In addition, its construction is designed for intensive use, with low maintenance and easy cleaning, which ensures continuous and stable operation.

FEATURES

Counting System:	Two lanes with individual fruit passage
Separating element.	Motorized circular brushes
Compatible fruit:	Orange, tangerine, lemon, grapefruit...
Capacity:	Gauge and line speed dependent
Materials:	Robust metal structure, easy cleaning, stainless steel.
Online Integration:	Adaptable to packaging and packaging systems
