

PACKAGING TABLE

DESCRIPTION

The **packing table** is a piece of equipment designed to **facilitate the filling of boxes of different sizes** quickly and orderly. It has **evenly distributed reception hoppers**, which allow the fruit to be deposited homogeneously in each box by means of a **distributor trolley** that guarantees a constant and controlled flow.

Its robust and practical design ensures efficient handling of citrus fruits and other fruits, optimizing the packaging process and minimizing the risk of product damage. It is an ideal solution for packaging lines that require speed, order and precision in order preparation.

FEATURES

Installed Power:	1.5 Kw
Voltage:	380/220V III [220V Single Phase on Demand]
Other features:	Assembled with a ready-made box output conveyor
Main function;	Facilitate homogeneous filling of boxes of different sizes
Distribution System:	Receiving hoppers with distributor trolley
Application:	Citrus, fruit of similar size and other fruits
Construction:	Robust metal structure, easy cleaning and maintenance
Online Integration:	Compatible with conveyor and packaging systems
Main Advantage:	Optimizes workflow and reduces damage to fruit
